1 Introduction

The Swedish banking market is adopting the international standard ISO20022 for payment messages. It will be a rollout over several years, and where we will develop new products and services around the credit transfer message for payments to bank accounts, Bankgiro numbers and Plusgiro numbers. It covers account transfers, bill payments, salary, pension, and social security benefits. Fully built, this new standard will improve integration with the international bank standards and benefit all our customers.

This document is a Message Implementation Guide for implementing usage of file reporting of account notifications from Länsförsäkringar Bank. The account notifications will report specific types of payments and Länsförsäkringar Bank will offer the following selections:

- · Incoming payments to Bankgiro number
- Outgoing payments initiated via pain.001 (excluding salary transactions)
- Outgoing salary payments initiated via pain.001
- Swish payments

This version of the Message Implementation Guide describes the XML format CAMT.054.001.02 and how it is used by Länsförsäkringar Bank. Depending on type of transaction the amount of information will differ as Länsförsäkringar Bank has different information sets.

NPC	The Nordic Payments Council manage the Nordic payment schemes in the future to facilitate payments within the Nordic countries. The main objective for the NPC is to contribute to harmonised payments in the Nordics.	
BIC	The Bank Identification Number is an international standard for bank identification.	
IBAN	International Bank Account Number.	
BBAN	The Basic Bank Account Number consists of a clearing number followed by the bank account number.	
XML	Extensible Markup Language, an open standard messaging format.	
XSD	An XML based schema to describe and validate an XML.	

1.2 Character set

The ISO20022 XML message must follow UTF-8 character encoding. Allowed characters supported are the Latin character set commonly used in international communication and in addition to this the Scandinavian characters and the @-sign, as follows:

a b c d e f g h i j k l m n o p q r s t u v w x y z å ä ö æ ø A B C D E F G H I J K L M N O P Q R S T U V W X Y Z Å Ä Ö Æ Ø 0 1 2 3 4 5 6 7 8 9

/-?:().,'+@ Space

References, identifications, and identifiers must respect the following:

- Content is restricted to the Latin character set as defined above
- Content must not start or end with a '/'
- Content must not contain '//'s

2 Different reports selection

In this section the selections and differences between the four Account Notifications are described. Which transactions that are reported can be determined by the file name.

2.1 Incoming payments to Bankgiro number

This Account Notifications report includes all incoming transactions to a Bankgiro number but not including autogiro. Detailed incoming information is included also for bulk booked transactions today reported via Bankgiro Inbetalningar.

The subscription for this report is done on account level. If a customer has several Bankgiro numbers connected to the same bank account, all Bankgiro numbers will be included in the report but split in different sections of the report. That is, the message will consist of one group header and then split into several Notification groups per Bankgiro number.

The file name for this report will be KFPR.CAMT.054.CREDIT_BG.V0.<Organisation number>.YYYYMMDDHHMMSSTTTTTT.xml. For test files the third character will be T instead of P.

2.2 Outgoing salary payments initiated via pain001

All settled debits initiated via pain.001 for one bank account will be reported in this

2.3 Outgoing payments initiated via pain001 (excluding Salary-like transactions)

All settled salary payments initiated via pain.001 for one bank account will be reported in this report (category purpose SALA, PENS or SSBE). All credit details will be included in the transaction Details. The file name for this report will be KFPR.CAMT.054.PAIN_SAL.V0.<Organisation number>.YYYYMMDDHHMMSSTTTTTT.xml.

For test files the third character will be T instead of P

2.4 Outgoing salary payments initiated via pain001

All settled debits initiated via pain.001 for one bank account will be reported in this report excluding salary payments (category purpose SALA, PENS or SSBE). All credit details will be included in the Transaction Details even if batch booking has been selected for the pain.001.

The file name for this report will be KFPR.CAMT.054.PAIN_NONSAL.V0.<Organisation number>.YYYYMMDDHHMMSSTTTTTT.xml. For test files the third character will be T instead of P.

2.5 Swish payments

This report will include all Swish transactions including refunds.

The subscription for this report is done on account level. If a customer has several Swish numbers connected to the same bank account, all Swish numbers will be included in the report but split in different sections of the report. That is, the message will consist of one group header and then split into several Notification groups per Swish number.

The file name for this report will be KFPR.CAMT.054.SWISH.V0.<Organisation number>.YYYYMMDDHHMMSSTTTTTT.xml.

For test files the third character will be T instead of P.

Message Specification CAMT.054

In order to receive Account notifications, the customer must subscribe to it. Once subscribed, they are sent to the customer in CAMT.054-format. The frequency can be chosen by the customer, but default frequency is once a day 7 days per week. There are four different types of Account Notifications.

The Account Notification will contain all monetary bookings on the account for the specific type of transaction (-s) with detailed information (based on the information Länsförsäkringar Bank has received). This information is normally similar to what is found on the digital account statement (called Transaction history) in the internet bank.

3.1 Document tag

Document tag is used to define the schema reference for the Camt.054 file. XML Schema or XSD is the xml document built to validate the attributes of an XML File The XSD document will be shared for user to pre-validate the file in their own system before importing the file.

Example of a document tag: < Document xmlns:xsi=http://www.w3.org/2001/XMLSchema-instance xmlns="urn:iso:std:iso:20022:tech:xsd: "CAMT054_LF_CORP_O_V0">

3.2 Group Header

The group header holds information about the whole CAMT.054 message. It will include a unique message ID and creation date and time.

3.2.1 Message ID

The **MsgID** element is the identification of the message. It will be unique and will be structured as Date plus BIC (ELLFSESS) plus running number.

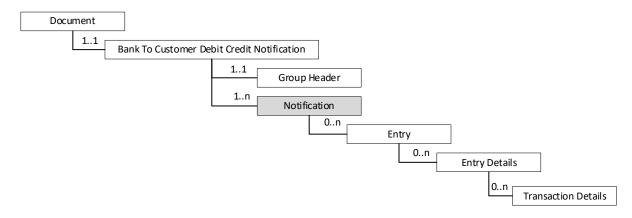

3.2.2 Creation Date and Time

The date and time format in element **CreDtTm** is from ISO8601.

3.2.3 Message recipient

This will not be used by Länsförsäkringar bank at the moment.

3.3 Notification

Department/Group

Payments

Author (also fact-checker)

Each message can consist of several Notifications. Each Notification is connected to one Bankgiro number, Swish ID or bank account. The information regarding this is gathered under the tag Account. Länsförsäkringar Bank will send one message per account if a customer has subscribed to CAMT.054 account notifications for several accounts. This can be changed in the future.

3.3.1 Identification

The notification identification number will be the MsgID plus a running number for the notification within the same message.

3.3.2 Creation date and Time

The date and time format in element **CreDtTm** is from ISO8601.

3.3.3 From To Date

Under this tag there will be both a start date and time and an end date and time for the account notification. All transactions booked on the account between these two times will be reported in the notification.

```
<FrToDt>
  <FrDtTm>2018-12-17T00:00:00+01:00</FrDtTm>
  <ToDtTm>2018-12-17T23:59:59+01:00</ToDtTm>
</FrToDt>
```

3.3.4 Account

Under this tag the reported account number will be sent in BBAN format with extra information if report is connected to Bankgiro number or Swish number. See example.

3.4 Entry

There will be one entry per transaction booked on the account. On this level information regarding the booked entry on the account will be presented. Some of the more detailed information will be handled in the transaction details.

3.4.1 Entry Reference

This is a unique ID for the entry set by Länsförsäkringar Bank.

3.4.2 Amount

In this tag the amount of the entry will be shown.

3.4.3 Credit Debit Indicator

This tag holds information if it is a debit (withdrawal from the account) or a credit (deposit on the account). The codes are DBIT and CRDT.

3.4.4 Status

The status of the entry reported will always be booked (BOOK).

Booking Date 3.4.5

This will be the date which the transaction was booked on the account.

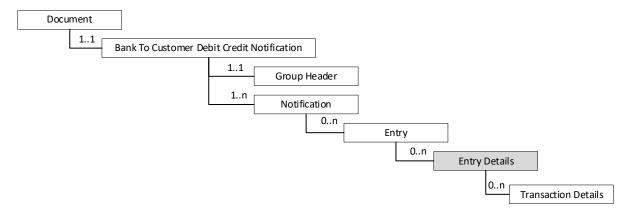

Bank Transaction Code

Set of elements used to fully identify the type of underlying transaction resulting in an entry on account. Länsförsäkringar Bank will use the code structure as per ISO to define the type of transaction that has been booked on the account. See appendix in Message Implementation Guideline for CAMT.054 for list of codes used by Länsförsäkringar Bank.

3.4.7 Additional Entry Information

In this field Länsförsäkringar Bank will report transaction texts (which also is viewable in the Internet Bank).

3.5 Entry Details

In this block there will be more details of the entry. For summarized bookings there will also be details on group level in the tag Batch.

3.5.1 Batch

In this block there will be information if the transaction is part of a batch booked entry. There are three different types of information in this tag. For salary transactions (via pain.001 or salary list) batch information will be reported but no details.

MessageIdentification – will hold messageID from pain.001

Department/Group

Payments

Author (also fact-checker)

- PaymentInformationIdentification will hold ID from the payment information part in pain.001
- NumberOfTransactions will be number of transaction details for this batch.

3.6 Transaction Details

For this block details regarding a transaction will be reported. For summarized booking on the account there can be many transaction details for one entry. For example for incoming Bankgiro transactions or batch booked transactions initiated via pain.001.

3.6.1 References

In this section there are several references included. Depending on type of transaction different references will be reported. For questions regarding a transaction to an officer in Länsförsäkringar Bank the best reference to use is the AccountServicerReference. This reference will be included also for salary transactions.

3.6.2 Amount Details

3.6.2.1 Instructed amount

Instructed amount will be reported for transactions in other currencies. It will be used for the amount in foreign currency.

Author (also fact-checker)

3.6.2.2 Transaction amount

The transaction amount will always be included and will always be in the account currency (always SEK).

For transactions in other currencies currency exchange information will be reported under this tag.

3.6.3 Related Parties

Information regarding related parties if they exist and are allowed to be reported.

3.6.3.1 Debtor

This is the party that has been debited for the transaction. Will normally not be supplied for outgoing payments (debits on the account) as this is the account owner.

For debits this will be mapped for the following payment types:

- Card transactions Merchant name if return
- File initiated payments from pain.001 file
- Debtor name from Swish message
- Debtor name for incoming Bankgiro payments
- Debtor name for incoming NCT transactions

3.6.3.2 Debtor Account

This is the account that has been debited for the transaction.

For Swish payments the Swish number will be reported here both for outgoing and incoming transactions.

For outgoing payments done from own Bankgiro number, that Bankgiro number will be reported here.

For incoming payments from Bankgiro number or Plusgiro number these will be reported.

3.6.3.3 Ultimate Debtor

This will be reported if included in outgoing or incoming message.

3.6.3.4 Creditor

This is the party that has been credited for the transaction. For outgoing payments this will be the name supplied by the initiator if applicable. For incoming payments this will be the name coming from the debtor if applicable.

For SWISH transactions this will be the name connected to the Swish number.

For outgoing Bankgiro and Plusgiro payments that Länsförsäkringar Bank will collect from the Bankgiro and Plusgiro catalogues.

3.6.3.5 Creditor Account

This is the account that has been credited for the transaction.

For Swish payments the Swish number will be reported here both for outgoing and incoming transactions.

For incoming payments to own Bankgiro number, that Bankgiro number will be reported here.

For outgoing payments to Bankgiro number or Plusgiro number these will be reported.

3.6.3.6 Ultimate Creditor

This will be reported if included in outgoing or incoming message.

3.6.4 Related Agents

Only creditor agent used and only for outgoing Bankgiro and Plusgiro payments. For payments initiated via pain.001, the information in pain.001 will be reported here.

3.6.5 Purpose Code

Purpose code sent with the transaction will be reported here if it exists.

3.6.6 Remittance Information

Under this tag Länsförsäkringar Bank will report the remittance information we have received from the initiator. It can be supplied as Unstructured or Structured remittance information.

4 XML structure

4.1 CAMT.054.001.02 Bank To Customer DebitCredit Notification

The XML structure matrix is divided into groups, so it should be easy to find different parts. Only the sections handled by LF in any way will show up here.

Some elements represent an exclusive choice between two or more child elements. These child elements are marked with XOR to indicate they belong to an XOR-split, where the choice of one element is mandatory. The multiplicity of an element is notated with an interval notation, like x..y, meaning x is the minimum number of occurrences of an element, and y is the maximum.
