### 3. Update of Risk Factors

The risk factor entitled "Risks relating to disruptions in the global credit markets and economy" on page 8 of the Base Prospectus shall be deleted in its entirety and replaced with the following:

#### **'Risks relating to disruptions in the global credit markets and economy**

Financial markets are subject to periods of historic volatility and the economic climate in the region is exposed to political risk, which may impact the Issuer's ability to raise debt in a similar manner, and at a similar cost, to the funding raised in the past. Challenging market conditions may result in greater volatility and reduced liquidity, widening of credit spreads and lack of price transparency in credit markets, which may affect the Issuer. These conditions and changes in investment markets, including changes in interest rates, exchange rates and returns from equity, property and other investments, may affect the financial performance of the Issuer. In addition, the financial performance of the Issuer could be adversely affected by a worsening of general economic conditions in the markets in which it operates. There are uncertainties as to the current political climate globally, including (but not limited to) the change of administration in the United States and the United Kingdom voting in favour of leaving the European Union (EU). With the details of the United Kingdom's exit from the EU still unclear, and uncertainty over trade arrangements, market access and legislative and regulatory frameworks, it is not possible to evaluate the impact the United Kingdom's exit may have on European economies and financial markets. Furthermore, the global spread of the coronavirus (**Covid-19**) during the first quarter of 2020 has had a significant negative impact on the global economy. The mitigating actions being taken by governments to contain the spread of Covid-19 has led to a huge decline in economic activity that will affect the Swedish economy as well as the development of financial markets. As of the date of this Supplement, it is highly speculative to predict what exact impact the effects of Covid-19 and the applicable measures and restrictions implemented due to the virus may have on the Issuer's operations. However, there is a risk that the Issuer's operations will be affected by the direct or indirect impact of Covid-19 on the Issuer's customers or counterparts, who, as a result, may develop a change in behaviour.

The possibility of an extended period of political uncertainty and financial market volatility as a result of such politically sensitive events or the spread of a contagious virus such as Covid-19 may also adversely affect the financial performance of the Issuer and its ability to raise debt in the international capital markets.'

### 4. Update of General Information

Items (2) and (3) under the heading 'General Information' on page 117 of the Base Prospectus shall be deleted in its entirety and replaced with the following:

- (2) There has been no significant change in the financial or trading position of the Issuer or of the Bank Group since 31 March 2020.

- (3) Save as disclosed in the risk factor entitled "Risks relating to disruptions in the global credit markets and economy", there has been no material adverse change in the prospects of the Issuer or of the Bank Group since 31 December 2019.'

To the extent that there is any inconsistency between (a) any statement in this Supplement or any statement incorporated by reference into the Base Prospectus by this Supplement and (b) any other statement in or incorporated by reference in the Base Prospectus, the statements in (a) above will prevail.

Save as disclosed in this Supplement, there has been no other significant new factor, material mistake or inaccuracy relating to information included in the Base Prospectus since the publication of the Base Prospectus.
